

PLAZA ENTRANCE ON TREWICK STREET

Steelton Town Center

Existing Streetscape

The corner location of Front and Trewick streets, because of its exposure, offers great opportunities as an anchor or signature building. It is intended that this building would compliment the master plan which is organized around a central green space surrounded by low-rise three-story buildings housing retail space at street level with mixed office and/or residential

on the upper two floors. Each use element has its own distinct character, and the architectural profile for each use should be carried through to a street-level identity for that use. Separate access to each use is essential, and entrances should have their own distinct identity.

Borough of Steelton
Dauphin County, Pennsylvania
